

# LIVE SYNCHRONOUS PD

Delivered via Zoom, Google Meet, or In-Person

## Achieve Depth & Complexity Through Compacting (6 hour)

As curriculum design and classroom instruction gets more advanced, mastery of differentiation is key.

However, differentiation doesn't mean do everything completely different for every kid! What if it were simple to add complexity that keeps curious minds exploring?

Quickly pre-assess and group students? Legitimately skip some lessons to make room for more student involvement?

In this workshop, we will model and teach compacting first. Then, we will layer in depth and complexity through hands-on, curriculum writing.

Quickly capture students' imagination through depth-laden questions and intrigue.
